RUGGED ELECTRICAL ACCESSORIES

Designed For A Lifestyle,
Built For A Lifetime™

Our Mission:

Since 2001, Powerlet's passion has been to provide Rugged Electrical Solutions for the Powersports Industry. Designing and manufacturing our products right here in Detroit, Michigan utilizing only the highest quality materials, Powerlet strives to solve the needs of riders with solutions that work no matter what conditions you ride in. From mounting and powering your smart phone to just staying warm while riding, Powerlet can help you make it happen.

Born out of necessity and refined with our relentless passion, testing, and perpetual design, our products exceed all standards and carry a lifetime warranty. From long distance to off road riding whether you just want to power your GPS or keep your battery charged, Powerlet has you covered.

Check out our Facebook page for up-coming events to hook up with our installation tour.

What is a Powerlet and why do we need it?

People rely on standard power outlets in their cars and homes to charge and power a variety of consumer electronics. Yet the majority of motorcycles and virtually all other outdoor vehicles are unable to even charge a cell phone, let alone power heated clothing without first modifying the vehicle. Powerlet makes it easy and convenient to install a Powersports Standard Connector to solve these issues.

Powerlet® & Luggage Electrix™ products are designed to be installed and/or used on Victory®, Ducati®, Harley® motorcycles, Honda®, Suzuki®, KTM®, BMW®, Kawasaki®, Aprilia®, Triumph®, Yamaha® and all other makes and models of motorcycles, ATV's, UTV's and powersport vehicles.

Choosing an outlet

Currently there are 4 outlet types that are used frequently in the Powersports industry. Your vehicle may already have one of these installed and while we support all 4 types of outlets, only the Powerlet outlet can truly do it all.

Powerlet Socket

Powersports Standard Connector (Powerlet)- This connector follows the DIN ISO Standard and has already been adopted in our industry by more than half of the manufacturers. With this outlet, the customer can easily take power out of the bike to power devices as well as putting power back in by charging the vehicles battery. The standard for this connector is 15amps that is connected directly to the battery. This is truly a "One outlet does it all" system and it's main differentiators from the other connectors are as follows:

Waterproof - Designed for a rugged outdoor environment, they will not fail after prolonged use out in the elements.

Vibration Proof - Male connectors snap in positively and offer a much better grounding connection allowing a secure connection that can still be easily unplugged by customers with gloves on.

Fuel and Oil resistant & UV Stable- All components offered from Powerlet are built with materials designed to function in the aggressive powersports environment.

UV Stable- Designed for an open canopy powersports vehicle to with stand extreme environments.

Get to know Powerlet. The standard for excellence.

The Powerlet Mark of Comfort, Convenience and Safety

The Powerlet Logo Program helps consumers make easy purchase decisions by identifying power outlets that have passed compatibility and reliability tests with the "Compatible with Powerlet 5A™" or "Compatible with Powerlet 15A™" compliance tests.

Genuine Powerlet compliance assurance strengthens consumer & Dealer confidence. Dealers can enjoy increased customer satisfaction with products that they can be confident will work for their customers. Consumers can quickly identify which vehicle is capable of charging cell phones, heated clothing, etc. Consumers realize that it's not only possible, but easy to power their consumer electronics off of their powersport vehicle.

Genuine Powerlet P5 and P15

Capable of 5 amps and suitable for smartphones, GPS, and MP3 players.

Capable of 15 amps and suitable for heated clothing, tire inflators, smartphones, GPS, and MP3 players. The genuine P15 is also capable of charging the vehicle's battery.

www.powerlet.com

GET
IT
ON

Coax

Coax Connectors – Powerlet utilizes a standard Coax 2555 connector for powering our RapidFIRE heated clothing. The majority of our competitors in this product line also utilize the same connection.

Powerlet® connectors are fully compatible with the factory power outlets found on BMW®, Triumph®, Ducati®, KTM®, Indian® and Victory® motorcycles.

Automotive

Automotive (Cigarette) Sockets – This connector is the most commonly known connector as we are used to using this type of connection in all our cars. While this connector is certainly suitable when used inside of luggage or a compartment, when it is installed on the exterior of a Powersports vehicle, it's limitations are quickly realized.

There is no standard for this connector type allowing construction with different depths, and diameters. The male portion that plugs in makes up somewhat for this discrepancy by having a spring loaded positive and negative connection.

Even in the car, these connectors often vibrate out requiring the consumer to continually push them in to the socket to keep their device powered.

Most of these that are commercially available are only rated for around 3 amps with some of the best marine grade versions approaching 10amps.

These outlets are not waterproof nor are the male portions that plug in to them designed to be exposed to the elements.

SAE

SAE Connectors – These 2 pin connectors are commonly found on battery chargers. Many dealers install these to promote battery maintenance for the customer. While we offer many products that can utilize the SAE connectors to power multiple devices, there are some limitations you should be aware of.

Most of the supplied SAE harness do not have enough current capacity to allow the powering of high current devices such as heated clothing and tire inflater's. They are typically fused at 5 to 7.5 amps and can not be upgraded. The SAE harnesses and adapters that Powerlet sells are a true 15 Amp circuit.

Powerlet to USB Adapter

PAC-069 Dual USB Type A to Powerlet Adapter

The wait is over! Powerlet to Dual USB Adapter Charging Plug is the world's most powerful device charger for USB powered devices. This dual USB Powerlet plug charger packs colossal power into a modest frame. This Powerlet accessory allows you to charge 2 devices at once - even 2 iPads simultaneously. Each USB port has been designed to supply 25 Watts (2.1A) of power. PAC-069 ultra low-profile design fits into your Powerlet socket and is easily adapted into an Automotive socket with an AAC-001 (compatible metal insert). Ensuring the best use of valuable space on your motorcycle. Works with: iPad, iPod, iPhone, Android Devices, Smartphones, Tablets, BlackBerry and MP3 Players

Automotive / Powerlet Adapters Solutions

AAC-001

Plug a Powerlet into an automotive lighter socket. Since automotive sockets come in multiple variations, not all are compatible with this metal insert. If it does not work properly the AAC-003 will solve the problem.

AAC-003

Automotive socket to a Powerlet female. Warning: Most Automotive sockets are not rated to handle heated clothing. 12" Long.

AAC-006 USB Type A to Automotive Adapter

Convert a automotive socket to an USB Type A Connector. Input: 12 VDC to 30 VDC, Output: 5V at 2.1 Amp.

DPD-100-24 Dealer ONLY 24 Pack

PAC-050

Powerlet Power Pac™

This complete adapter set offers three of the most popular versions of adapters. Includes short versions of our Powerlet to Automotive adapter, Powerlet to SAE for battery charging and Powerlet to coax for heated clothing.

PAC-051

Powerlet Power Pac™

For customers not riding with heated clothing, this set offers an automotive socket to a USB Type A Connector. Input: 12 VDC to 30 VDC, Output: 5V at 2.1 Amp. Powerlet to SAE for battery charging and Powerlet to automotive adapter.

Dented your tank with a automotive phone charger lately?

When utilizing the factory automotive socket on your Ultra or Street Glide, many have discovered that when the bars are turned to the left, your charger will dent the gas tank on all newer models with the 6 gallon tank. The above solutions utilize the factory socket but convert it to a vibration-proof Powerlet outlet. Using our power cables that use the low profile Powerlet plug, your device can be powered without fear of denting your tank.

The above parts utilize the AAC-001 Automotive to Powerlet adapter along with a short-ened version of our most popular device specific charging cables featuring a 18" cable length.

Power Outlet Kits

BMW[®] Motorcycles / BMW[®] CANbus[®]

HEATED CLOTHING
iCAN[™]
BMW CANBUS
BATTERY CHARGING

When CANbus can't, Powerlet CAN

Now you can safely power your heated clothing or use your standard battery charger on your 2005 and later CANbus equipped BMW motorcycle using our simple iCAN Harness. Don't be tempted to dangle cheesy cords off your bike when you can have a proper factory looking outlet. Visit your local participating BMW GWIP program dealer for a new bike that is already Powerlet Equipped!

PKT-042 Standard iCAN Kit

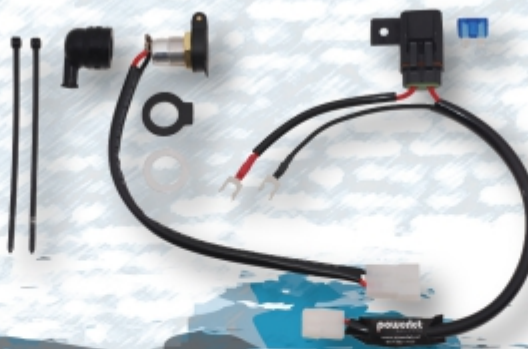

This kit replaces the factory 5 amp CANbus outlet allowing the use of standard battery chargers and heated clothing by converting it to a true 15 amp outlet. Available in 12", 36" & 48" harness lengths.

PKT-046 Low Profile iCAN Kit

Some BMW applications will call for a low profile iCAN kit depending on clearance behind the socket. Consult our Shop by Vehicle section of our website for specific kit fitment.

BMW[®] 5 amp
Outlet

www.[powerlet](http://www.powerlet.com)

The CANbus Problem

Factory BMW outlets powered by the CANbus system turn on and off with the motorcycle ignition, which does not allow the use of a standard battery charger. CANbus-driven outlets also automatically shut off when the current exceeds 5 amps; prohibiting the use of most heated clothing, which can draw up to 15 amps. BMW's current outlets are only rated for 5 amps.

Powerlet Solution

Powerlet's iCAN solutions provides a true 15 amp outlet heavy duty replacement wiring harness allowing the use of a standard battery charger and heated clothing. The replacement harness will not affect or damage the CANbus system.

Powerlet Powerbar Plus

Powerlet's Power Bar Plus permits riders to mount and power their device off the same bracket. Made right here in Detroit, the Powerbar Plus is a billet aluminum bracket that is finished in either a chrome or black anodized finish. This complete kit comes with a 60" harness and everything you need for an easy install. Included rubber dampers add an additional level of vibration damping for your device. Most commonly used to mount and power cell phones, GPS, and radar detectors. With our quick release mounting systems, you have the ability to quickly remove your device and power cords when you have finished your ride. As with all Powerlet outlets, you can power out to power your devices and keep your battery charged.

PKT-090-54-C

PKT-090-54-B

Fits 7/8" To 1" sized handlebars most commonly used on Cruisers and Harleys. Available in black anodized or chrome.

PKT-091-54-C

PKT-091-54-B

Fits 1-1/8" To 1-1/4" sized handlebars commonly found on Adventure and Off Road type motorcycles. Available in black anodized or chrome.

PKT-069-B Type 3 Rearset Kit

Cable Mounted Powerlet Outlets

Cable-mounted Powerlet sockets are designed for ease of installation. Ideal for those not wanting to drill into a panel.

PKT-003 Powerlet Socket Battery Harness

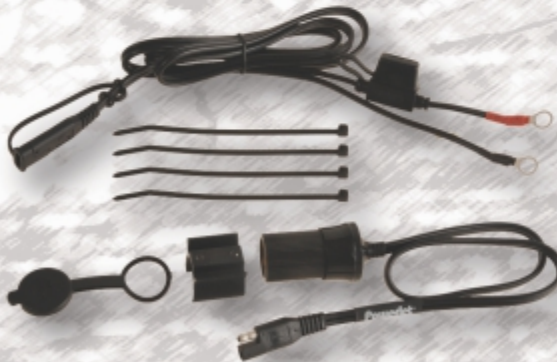

Quickly install a Powerlet 15 amp outlet anywhere on your vehicle. Kit comes complete with everything needed for an easy install and also includes a C-clip to retain the outlet and a weather proof cap.

Cable Mount Automotive Outlets

PKT-101 EZ Power Kit

Quickly install an Automotive socket anywhere on any vehicle. Features a heavy duty 15 amp battery to SAE lead, and SAE to Automotive outlet adapter allowing battery charging, and cell phone or GPS powering. The SAE to Automotive adapter can be stored when not in use. Also comes with a weather proof cap for the outlet and a C-clip to secure it.

PKT-101 EZ Power Kit

Panel Mount Outlets

As with all Powerlet socket kits, these power outlets can do everything. Power-in for battery charging, no problem. 15 amps out for heated gear, no problem. The fuse-holders are waterproof and use standard ATO style fuses. The terminals are highly annealed copper. Heavy duty wiring harness made from UV stable, oil and gas resistant components. 105C 16 AWG wire and sleeving. With a variety of harness length options, you can put your outlet where ever you need it. Factory installed appearance and easy installation.

Power Outlet Kits

PKT-042 Powerlet Socket Kit

Our most popular kit. Available in 12", 24", 36", 48", and 60" harness lengths. Requires you to drill a panel. [2" clearance required behind panel to mount.]

PKT-046 Low Profile Powerlet Socket Kit

Low profile socket reduces depth needed behind the panel. Available in a variety of harness lengths that include 12", 24", 36", 48" and 60". [Requires 1" behind panel to mount.]

PKT-039-12 Multi-Fit Second Socket Kit (12")

Adds a second Powerlet socket without adding a second harness. Plugs into any Powerlet harness with a white T-connector.

Automotive Panel Mount Outlets

AKT-001 Automotive Socket Panel Mount Kit

Weather-proof tether lid. T-connector makes wiring easy. This high quality socket requires a 1.125" hole. Top flange is 1.510" diameter & requires 1.75" behind the panel. Comes with a cigarette lighter element. 10 amp capacity.

Termin 8

Powerlet Specialty Kits

Powerlet's Specialty Kits are designed for the farkers and adventurers out there. From just managing connections for all your accessories to allowing easy jumping of your battery, Powerlet has you covered.

NEW!

PKT-103 Termin-8

Have a bunch of accessories you want to hook up but don't have room on your battery? Termin-8 makes it easy to mount up to 8 devices with only one connection at the battery post. No more worrying about where to mount a chunky fuse block. Made with heavy duty 12 AWG wire, hard coat anodized with red and black color blocks for easy installation. Termin 8 is capable of handling 20 amps. This solution also makes it easy to service your devices by simply pulling the fuse. Patented.

www.powerlet.com

Real Jumper Cables

Take the worry out of jump starting motorcycles and ATV's with this high current jumper cable kit. This kit provides a convenient method for group leaders to jump start another members vehicle or their own vehicle. A favorite product for adventure touring riders that travel to remote parts of the world. Used by police and military personnel. Standard harness length is 60 inches, short enough to store and long enough to reach from one vehicle to another. Our jumpstart kits are assembled and tested in the USA by people who ride. Made with flexible marine grade 8 awg solid copper wire that is oil and gas resistant and UV stable. Fully annealed terminals and the highest current connector available ensures maximum power transfer. Quality components and attention to detail ensure Powerlet products resist wear and corrosion to last a lifetime.

PKT-104

Made of the highest quality components, this product can deliver the power from one vehicle to another. Designed to be small in size and easy to pack on your bike or ATV.

Universal Power Kits

When you need a low cost, quick installation of a 12V power outlet, look no further. Powerlet offers these easy to install kits designed to provide you with either a SAE, Powerlet, Coax, or Automotive outlet. For quick powering of heated clothing, battery charging, or just charging your cell phone.

Made from the highest quality materials, all components are UV stable and are oil/gas resistant and will not deteriorate over time. The fuse-holders are waterproof and use standard ATO style fuses. The terminals are highly annealed copper. Everything you need is included right down to the tie-wraps.

PKT-001 Heavy Duty SAE Battery Lead

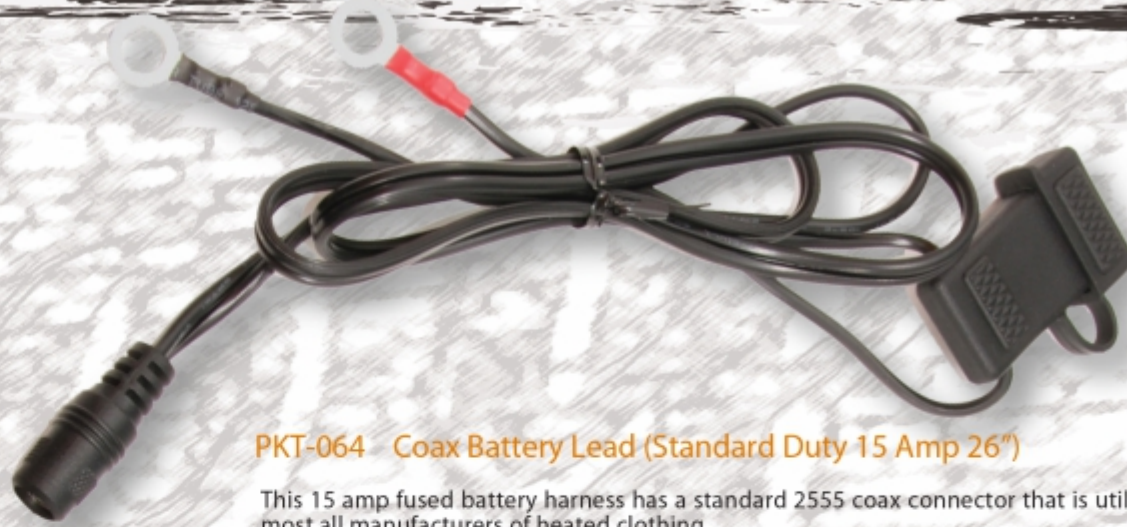

Our heavy-duty SAE battery leads can handle 15 amps of current. Other SAE battery leads use much thinner wire and are fused at 3 to 7.5 amps not allowing the powering of high current devices such as tire inflators or heated clothing. Includes a 15 amp fuse and tethered dust cap. Available in 24" or 48" harness lengths.

PKT-003 Powerlet Socket Battery Harness

Heavy duty wiring harness made from UV stable, oil and gas resistant components. 105C 16 AWG wire and sleeving. Cable mounted Powerlet socket with a 15 Amp capacity. 48" Harness with weatherproof cap and C-clip for easy mounting.

Universal Power Kits

PKT-064 Coax Battery Lead (Standard Duty 15 Amp 26")

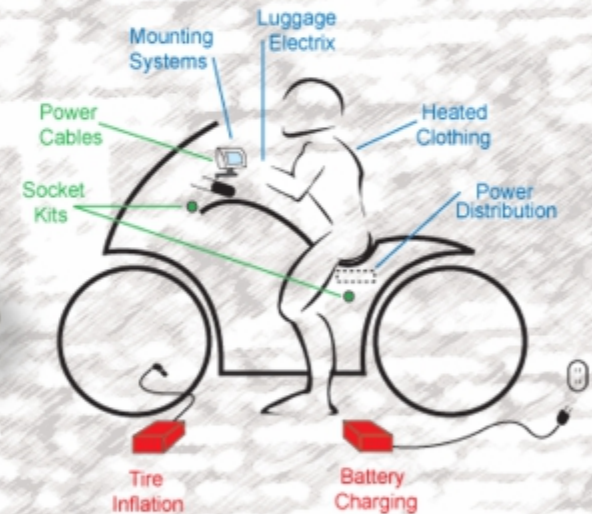

This 15 amp fused battery harness has a standard 2555 coax connector that is utilized by most all manufacturers of heated clothing.

Fit's ALL Motorcycles
Makes and Models.
Easy Power Solution.

PKT-101 EZ Power Kit

Quickly install an automotive socket on any vehicle. The socket is secured with provided C-Clip and comes with a weather proof cap. SAE to Automotive adapter cable can be removed for easy storage. Fused at 15 amps and designed for an easy install, this is our most popular simple solution for cell phone or GPS charging while also allowing you easy access to charge your vehicles battery.

USB Powerlet® Adapter

RUGGED ELECTRICAL ACCESSORIES

Power Cables

Powerlet® offers the most complete line of power and adapter cables for the powersports industry. Powering a cell phone, GPS, iPod®, or radar detector is simple with our cables. Cell phones use more power trying to seek towers during travel causing the battery to die early in the day. This is not a problem when you are Powerlet® Equipped. Battery charging through your Powerlet® socket is also easy with cables designed to both power out and power in. Battery chargers typically double the useful life of AGM, wet or sealed batteries. Using a charger means a greener planet.

Complete Adapter Sets

PAC-050

Powerlet® low profile plug to two automotive sockets. Approximately 60" long.

PAC-031

Connects any two devices that have an automotive type plug to a Powerlet® socket. Coil cord is 24" then stretches to over 4 ft. for easy connection.

Power Cables / Cell Phone Charging Cables

New iPod® 5 Cable Choices

PPC-033 iPod® 5

Works with iPod® iPod® 5 and iPod® Touch. Features voltage reduction circuitry in a 32" coil cable with Powerlet® right angle plug.

PPC-033-SC iPod® 5

Works with iPod® iPod® 5 and iPod® Touch. 12" overall length with Powerlet® plug is perfect for using with Powerbar Plus or just when you don't need a long cable.

PPC-033-DB iPod® 5

Works with iPod® iPod® 5 and iPod® Touch. With a 60" cable length, this cable is designed to connect directly to the vehicle's battery.

PPC-036 iPod® 5

Automotive to Powerlet® Solution

iPod® 5 and iPod® Touch solution includes automotive to Powerlet® insert (AAC-001) and the Powerlet® PPC-033 iPod® 5 cable. 18" Length coil cable with Powerlet® right angle plug. Perfect Solution to maximize the factory Harley fairing mount socket without clearance issues.

iPod® & iPhone® 3, 4 and 4S Cable Choices

PPC-026 iPod® & iPhone® 3, 4 and 4S

Works with iPod® iPod® 3G, 3GS, 4G, 4GS, iPads and iPod® Touch. Features voltage reduction circuitry in a 32" cable length with Powerlet® right angle plug.

PPC-026-SC iPod® & iPhone® 3, 4 and 4S

Works with iPod® iPod® 3G, 3GS, 4G, 4GS, iPads and iPod® Touch. 12" Long with Powerlet® plug, this short cable is optimized for use with our Powerbar Plus.

PPC-026-DB iPod® & iPhone® 3, 4 and 4S

Works with iPod® iPod® 3G, 3GS, 4G, 4GS, iPads and iPod® Touch. With a 60" cable length, this cable is designed to connect directly to the vehicle's battery.

PPC-030 iPod® & iPhone® 3, 4 and 4S

Automotive to Powerlet® Solution

Works with iPod® 3G, 3GS, 4G, and 4GS, iPads and iPod® Touch. Solution includes automotive to Powerlet® insert (AAC-001) and the Powerlet® PPC-026 cable. 18" Length coil cable with Powerlet® right angle plug. Perfect Solution to maximize the factory Harley® automotive fairing mounted socket without clearance issues. fairing mount socket.

Micro USB Cable Choices

PPC-027 Micro USB

Works with all Android, Blackberry and any device requiring a Micro-USB. Features voltage reduction circuitry in a 32" cable length with Powerlet® right angle plug.

PPC-027-SC Micro USB

A short cable version of the Micro-USB cable. This short cable length measures approximately 12 inches and is ideal for situations that may require a little less cable.

PPC-027-DB Micro USB

A direct to battery harness version of the Micro-USB cable designed to work with all devices using this connector type. 60" overall length designed to connect directly to the vehicle's battery.

PPC-031 Micro USB

Micro USB solution includes automotive to Powerlet® adapter (AAC-001) and the Powerlet® PPC-027 Micro USB cable. 18" length cable with Powerlet® right angle plug. Perfect Solution to maximize the factory Harley® fairing mount socket without

Automotive to Powerlet® Solution

Mini USB and GPS Cable Choices

PPC-015 Mini USB and GPS

Works with most appliances that utilize a Mini USB connector. Features voltage reduction circuitry in a 32" cable length with Powerlet® right angle plug. Includes PPC-024 adapter for Garmin GPS units.

PPC-015-SC Mini USB and GPS

Works with most devices that utilize a Mini USB connector. 12" length with a Powerlet® straight plug. Includes PPC-024 adapter for Garmin GPS units.

PPC-015-DB Mini USB and GPS

Works with most appliances that utilize a Mini USB connector. Direct to battery 60" fused harness. Includes PPC-024 adapter for Garmin GPS units.

PPC-029 Mini USB and GPS

Mini USB solution includes automotive to Powerlet® adapter (AAC-001) and the Powerlet® PPC-015 Mini USB cable. 18" cable with Powerlet® right angle plug. Includes PPC-024 adapter. Perfect Solution to maximize the factory Harley® fairing mount socket without clearance issues.

Automotive to Powerlet® Solution

Power Cables

Garmin Cable Choices

PPC-015

Works with most devices that utilize a Mini USB connector. Features voltage reduction circuitry in a 32" coil cable with Powerlet® right angle plug. 32" coil cable length and Powerlet® right angle Plug. Includes PPC-024 adapter for Garmin GPS units.

PPC-024

This adapter is included in all our PPC-015 cables. Required for use with Garmin GPS units. Special circuitry inside this adapter puts the GPS in charge mode.

Radar Detector Cable Choices

Powerlet® supports a variety of different cables for various radar detector manufactures. Available in 36" lengths, 12" SC short cable, and DB direct to battery configurations.

PPC-004

Works with Escort, Valentine 1, Beltronics RX65 and a number of other compatible radar detectors using a RJ11 jack. 36" Coil cable and Powerlet® right angle Plug.

PPC-004-DB

Works with Escort, Valentine 1, Beltronics RX65 and a number of other compatible radar detectors using a RJ11 jack. Direct to battery 60" fused harness.

Power and Mount A Gadget

With most everyone using smart phones and GPS devices these days, Powerlet's mounting systems are the perfect partner with our Powerbar Plus (sold separately) to allow you to both mount and power your device right off your handlebars. If you want to stream music, talk on the phone, navigate, or text your riding buddy (none of these are recommended of course) Powerlet has you covered.

NEW!

PBK-023

Cradle and power your Android, Blackberry or any device requiring a Micro-USB. This kit provides RAM components to mount the phone from a Powerlet® Powerbar Plus (sold separately). PAC-069 DUAL USB Type A to Powerlet® Charger with short USB To Micro USB Power Cable 6.5" Length. PAC-062-USB

NEW!

Mounting Systems

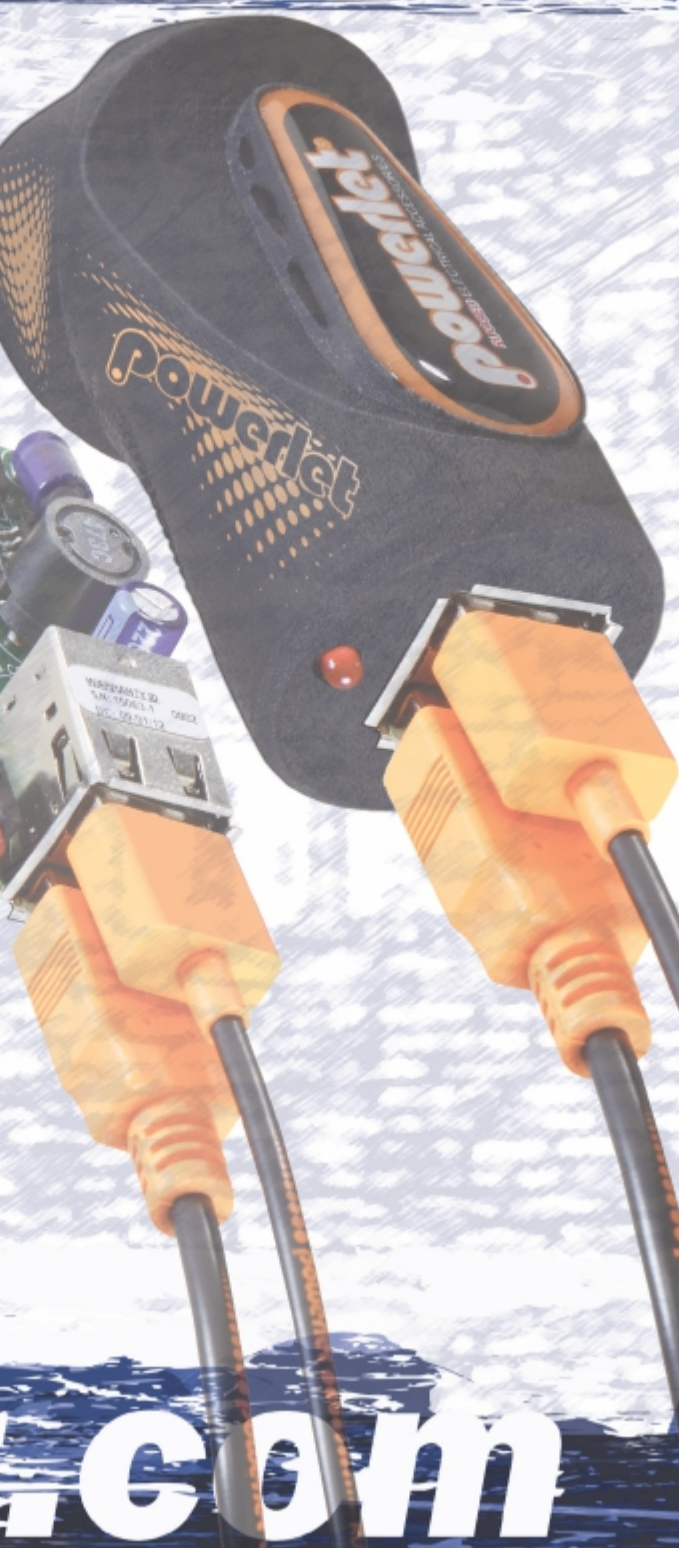

PBK-024

Cradle and power your Apple iPhone 3G, 3GS, iPhone 4 and 4S. This kit provides RAM components to mount the phone from a Powerlet® Powerbar Plus (sold separately). PAC-069 DUAL USB Type A to Powerlet® Charger with short USB To iPhone 3G, 3GS, 4 and 4S USB Power Cable 6.5" Length. PAC-063-USB cable powers the iPhone without excess cable.

PBK-025

Cradle and power your Apple iPhone 5. This kit provides RAM components to mount the phone from a Powerlet® Powerbar Plus (sold separately). PAC-069 DUAL USB Type A to Powerlet® Charger with short USB To iPhone 5 USB Power Cable 6.5" Length. PAC-064-USB cable powers the iPhone 5 without excess cable.

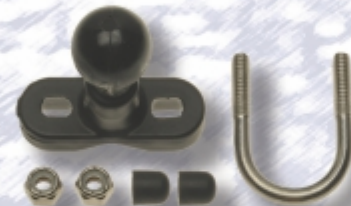

Power and Mount a Gadget

PBK-007

RAM Double Socket Arm For 1" Ball

PBK-008

RAM Base w/ U-Bolt Fits 3/4" To 1 1/4" Diameters

PBK-009

RAM 2 7/16" X 1 5/16" Diamond Base w/ 1" Ball

PBK-010

Used with our Powerbar Plus series. 3/8"-16 thread pitch.

PBK-012

Cradle and power your Apple iPhone 3G, 3GS, iPhone 4 and 4S. This kit provides RAM components to mount the phone from a Powerlet® Powerbar Plus (sold separately). Included short Powerlet cable powers the iPhone without excess cable.

PBK-015

Cradle Apple iPhone, with this rugged universal cradle. Does not come with PBK-009 Ram ball diamond Base. This cradle is used in our PBK-012 and PBK-013 Mounting Kits. Adjustable to work with phone bumper / case / skin.

PBK-020

Cradle and power your Apple iPhone 5, and any Apple device with a Lightning® connector. This kit provides RAM components to mount the phone from a Powerlet® Powerbar Plus (sold separately). Included short Powerlet cable powers the iPhone without excess cable.

PBK-013

Cradle and power your Droid, Blackberry and other devices. This kit provides RAM components to mount the phone from a Powerlet® Powerbar Plus (sold separately). Included short Powerlet cable powers phone without excess cable using the Micro USB connector.

PBK-017

RAM Motorcycle perch mounted brake/clutch reservoir base with 1" Ball.

Plugs, Sockets, Wiring & More

Powerlet® Plug Choices

NEW

PPL-006 Straight Plug

New and Improved straight Powerlet® Plug. Features improved construction for easy installation with flat spade connector and straight barrel crimp. Good for heated vest cords, radar detector cables, GPS units, - the stuff you use while riding (includes new re-designed strain relief). NOTE: When replacing an existing automotive plug, verify that the automotive plug does not contain a voltage reduction circuit.

NEW

PPL-007 Right Angle Plug

New and improved right angle Powerlet® plug. Features improved construction for easy installation with flat spade connector and straight barrel crimp. Low profile plug. (new re-designed strain relief). NOTE: When replacing an existing automotive plug, verify that the automotive plug does not contain a voltage reduction circuit.

PPL-002 Deluxe Plug

Good for radar detectors, GPS Units, cell phone adapter cables - the stuff you bring riding. Includes a cable clamp (strain relief) & grommet. NOTE: When replacing an existing automotive plug, verify that the automotive plug does not contain a voltage reduction circuit.

PPL-003 Super Duper Plug

Good for heated vest cords, radar detector cables, GPS units, - the stuff you use while riding (includes strain relief & boot). NOTE: When replacing an existing automotive plug, verify that the automotive plug does not contain a voltage reduction circuit.

PPL-004 Right Angle Plug

Low profile plug. NOTE: When replacing an existing automotive plug, verify that the automotive plug does not contain a voltage reduction circuit.

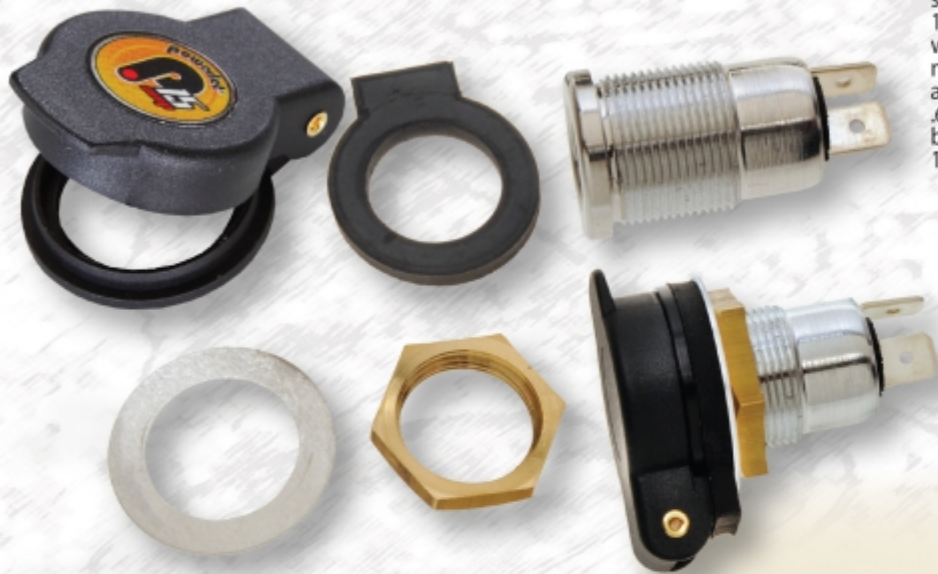

Plugs, Sockets, Wiring & More

Powerlet® Socket Choices

PSO-001
Standard Outlet

Our most popular socket with spring-loaded hinged lid. Two 1/4" spade connectors, make wiring easy. 18mm brass jam nut. Rated at 15 amps, snap-fit and vibration proof. Requires .6875" (11/16") hole and 2.00" behind the panel. Lid measures 1.075" in diameter.

PSO-004
Cable Mounted Powerlet® Socket

Use this socket to make custom extension cables. Two internal spade lugs are provided for easy connection. Unlike automotive sockets these Powersport Standard Connectors are smaller in size, rated at 15 amps and are vibration proof.

www-powerlet

PSO-007
Low-Profile Powerlet® Outlet

Spring-loaded hinged lid. White-T connector uses 1/4" spade connectors on 9.00" leads. 18mm brass jam nut mounting. Rated at 15 amps, snap-fit and vibration proof. Requires .6875" (11/16") 18mm hole and 1.00" behind the panel. Lid measures 1.075" in diameter.

PSO-008
Powerlet® Socket Complete

Now a complete socket solution. Includes our most popular socket PSO-001 with rubber boot, white T connector, and terminals to simplify wiring. 18mm ss jam nut. Rated at 15 amps, snap-fit and vibration proof. Requires .6875" (11/16") 18mm hole and 2.00" behind the panel. Lid measures 1.075" in diameter.

Individual Automotive Sockets

ASO-002 Panel Mount
Automotive-Socket

Marine grade with rubber / weather-resistant tethered lid. Socket mounts through panel with jam nut for fastening. Rated to run most all appliances. Requires 1.125" hole and 1.75" behind the panel. Top panel flange measures 1.510" in diameter. White-T Connector lead for easy wiring.

Plugs, Sockets, Wiring & More

Fuse Blocks

PKT-103 Termin-8

Have a bunch of accessories you want to hook up but don't have room on your battery? Termin-8 makes it easy to mount up to 8 devices with only one connection at the battery post. No more worrying about where to mount a chunky fuse block. Made with heavy duty 12 AWG wire, hard coat anodized with red and black color blocks for easy installation. Termin-8 is capable of handling 20 amps. This solution also makes it easy to service your devices by simply just pulling the fuse. Patented.

PMI-001 Water proof Fuse Holder

Holds 1 ATO fuse, 1 amp to 15 amp.

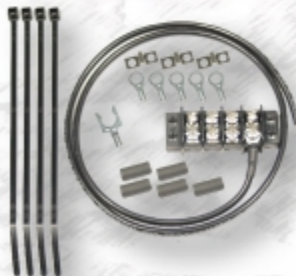

PMI-002 4 Position Fuse Holder

Holds 4 ATO fuses, 1 amp to 15 amp.

Ground Blocks

PMI-017 Ground Block

Convenient grounding block assembly accommodates ground wire connections. Small size enables installation anywhere on the bike. Comes with block, jumpers, crimp connectors and UV stabilized straps.

PMI-019 Fuse Block Assembly

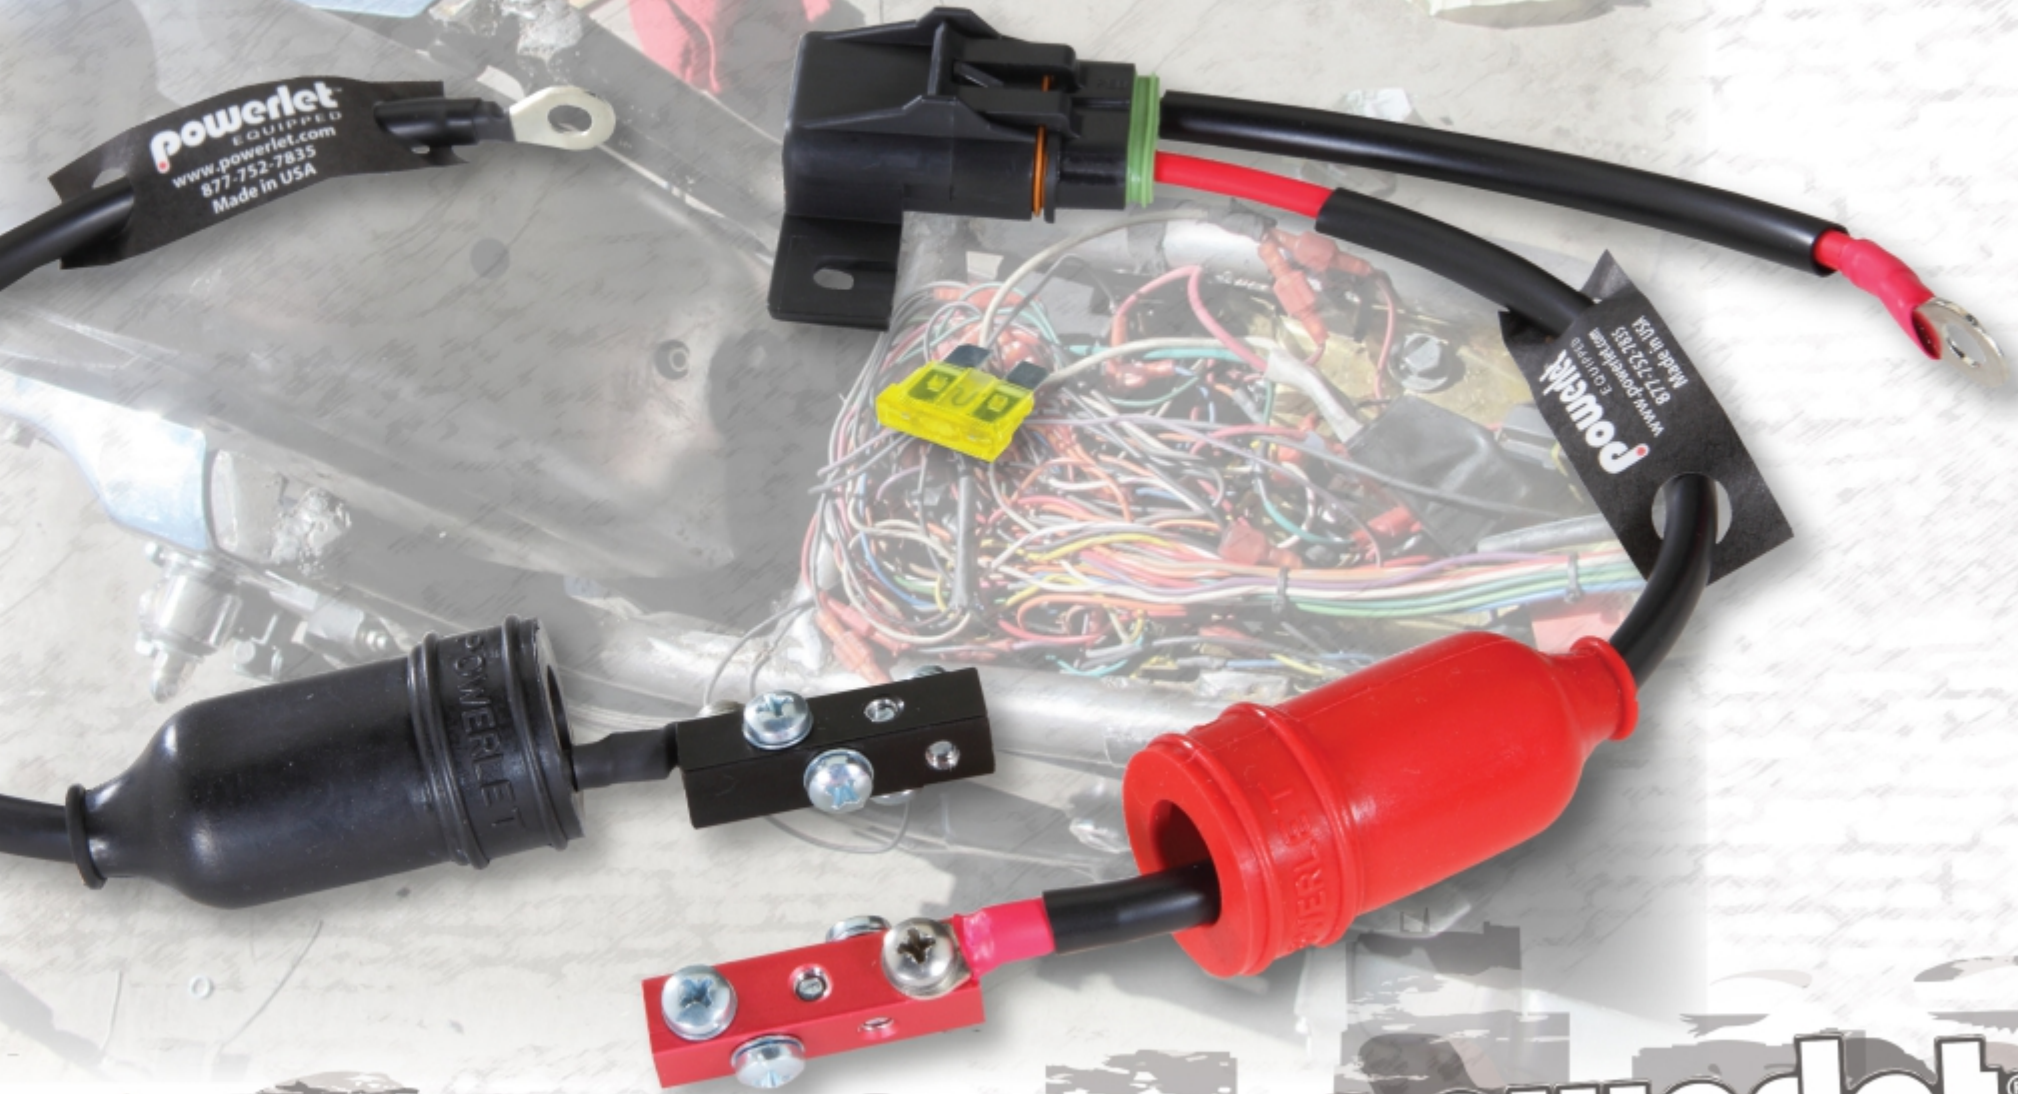

Holds 4 ATO fuses, 3 amp to 15 amp. Kit comes complete with PMI-002 Fuse block, jumping wires, crimp connectors, battery lead and UV stabilized black straps.

Look Familiar? What a Mess.

Let Powerlet® help you organize the wires under your seat, safely and securely. You have nothing to lose but the mess. We have a variety of options and solution, that won't break the bank.

RUGGED ELECTRICAL ACCESSORIES

Plugs, Sockets, Wiring & More

Automotive Socket Accessories

PMI-004 Automotive Socket C-Clip

With two screw mount holes this clip provides a convenient way to hold the cable mounted Automotive socket.

PMI-003 Automotive Socket Cover

The rubber cap fits our standard Automotive socket, providing protection from the elements when not in use.

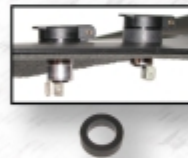

Powerlet® Socket Accessories

PMI-005 Powerlet® C-Clip (For PSO-004)

Mountable with a single screw. This clip provides a convenient way to hold a cable mount Powerlet® socket. Holds the socket when not in use.

PMI-008 Depth Reducing Spacer

Oil & weather resistant high-durometer rubber with the height 0.31 inches. Reduces clearance necessary behind panel: standard clearance 1.75 inches - with spacer: clearance behind panel 1.44 inches. Guaranteed 15% increase in horsepower or your money back.

PMI-011 Right Angle Rubber Boot

Oil & weather resistant high-durometer rubber provides additional protection for Powerlet® sockets and connectors under harsh conditions. Right angle design allows for installation in tight places. It is also use in Automotive Socket Accessories.

PMI-007 Powerlet® Socket Cover (For PSO-004)

Perfect solution to keep foul weather out of a cable mounted socket. Slips directly over the end and is friction fit so it stays in place. The PMI-009 will also fit the PSO-004.

PMI-010 Straight Rubber Boot

Oil & weather resistant high-durometer rubber provides additional protection for Powerlet® sockets and connectors under harsh conditions. It is also use in Automotive Socket Accessories

PMI-014 White T Connector

This connector fits perfectly to the oriented terminals on the rear of the PSO-001.

PMI-009 Hinged Cover

Use this handy replacement cap if you break a old one. Easily changed out once you dismantle the PSO-001 socket.

PMI-015 Socket Washer

Designed to work beneath a PMI-009 hinged lid. Tab portion safely supports the lid for longer life.

Individual Powerlet® Brackets

NEW!

PBR-010

Chrome bracket used in our Harley Mid Kit. High quality chrome finish is sure to complement any installation of a Powerlet® Socket. 5/16" Clearance mounting hole with 18mm (11/16") Powerlet® socket hole. Available in black or chrome.

PBR-002

This bracket fits a wide variety of applications. It has a 8mm clearance mounting hole and an 18mm socket hole. Available in black or silver anodized finish.

PBR-004

Our "L" Bracket is used when there is a snug area to mount in. Provides extra length for clearance. Comes with an 8mm clearance hole for mounting.

Luggage Electrrix

Power Everything

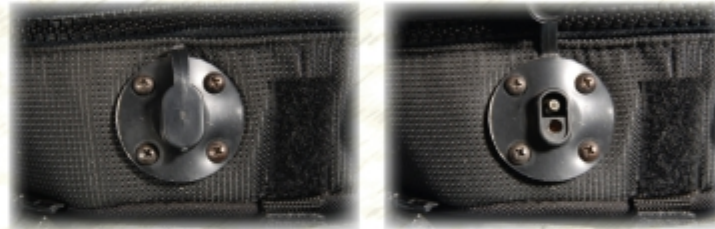

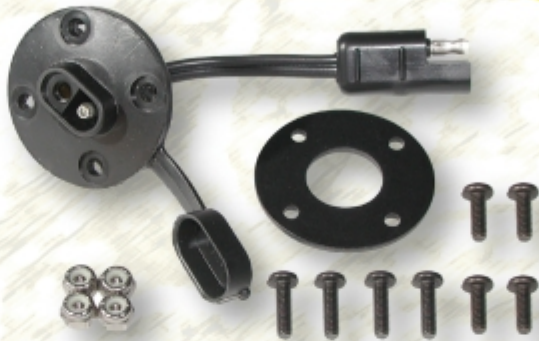

Powerlet®'s Luggage Electrrix system is designed to bring power inside of your tankbag, saddlebag, or trunk allowing you to power your devices out of prying eyes when left unattended. Our bulkhead connector easily installs through fabric, leather, metal and plastic. Choose a complete solution (PTB-004) or use our many options to build a solution just the way you want to.

www.powerlet.com

PTB-001 - Luggage Electrix Bulkhead

Molded plastic SAE flange mounts conveniently into any tankbag or saddlebag (soft or hard sided luggage). Easy to install, this bulkhead connector permits power to be passed through the luggage wall. Patented.

PTB-004 - Luggage Electrix Power Kit

This easy to install kit comes with everything you need to bring power to, through, and inside of your bag. Includes Luggage Electrix bulkhead, PAC-026 Automotive, SAE connector and 48" battery harness. Patented.

Luggage Electrix

Power Everything

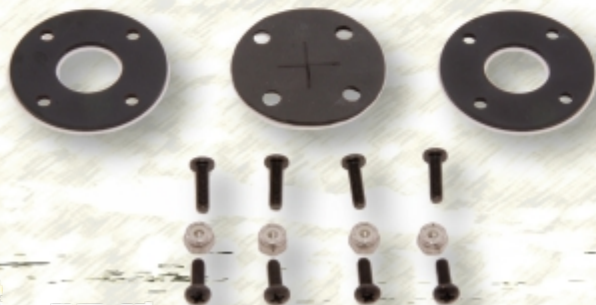

PTB-007

Includes everything in PTB-001 plus PAC-030 dual Automotive cable. Requires external power cable. Patented.

PTB-009

The perfect add on to the popular PTB-004 kit, this PTB-009 adds an outlet to the outside of the bag if you wish to have an outlet on the outside for powering heated clothing or another external device.

PTB-010

Designed to install into a tankbag (hard or soft luggage) permitting audio & power cables to "pass-through" the wall. Sandwich construction with UV, oil & gas resistant EPDM rubber.

Luggage Electrix External Cables

Bring power to any tankbag, saddlebag, or tour pack with our Luggage Electrix™ line of external cables. Simplify external wiring by maintaining the correct cable lengths insuring a neat and tidy installation. Remember, less time wiring means more time riding!

PAC-011

External cable for powering SAE Luggage Electrix Bulkheads. Low profile right angle plug) for maximum clearance. Made with 16awg gauge wire. Can also be used to convert a battery charger or SAE heated clothing to a Powerlet socket. Available 12" 24" long.

PAC-022

Heavy-duty 16 awg wire SAE to SAE extension cable. Available in 24" or 36" lengths.

PKT-001

Our heavy-duty SAE battery leads can handle 15 amps of current. Other SAE battery leads use much thinner wire and are fused at 3 to 7.5 amps. The heavy 16 gauge wire is a must for powering SAE type heated clothing. An excellent choice for Luggage Electrix. Includes 15 amp fuse and tethered dust cap. Available in 24" or 48" lengths.

Team Powerlet

PAUL JAMES

Fast Facts: Paul James is a veteran club racer with 49 expert class wins and 11 championships. He enters his third season as an AMA Pro rider with experience in Moto-GT1, Daytona SportBike and the Vance & Hines XR1200 class.

2009 – Finished fourth in AMA Pro SunTrust Moto-GT1 with a class win at Road America and podium finishes at Mid-Ohio and New Jersey Motorsports Park.

2008 - Finished 3rd in SunTrust Moto-ST GrandSport Twins class championship with 6 podium finishes.

Won the ASRA Team Challenge GT Lights national endurance championship with 3 class victories.

2007 - Won the SunTrust Moto-ST GrandSport Twins class at Iowa Speedway and posted three additional GST podiums. Finished 3rd in GST championship.

2006 - Finished 2nd in class in Inaugural SunTrust Moto-ST 8 Hours at Daytona race.

Early career – Earned 7 CCS Regional Class Championships (2003, 2004, 2006, 2007); 2 CCS Blackhawk Farms Track Championships (2006); and took the F-USA Team Challenge GT Lights National endurance championship with teammate David Swarts (2003).

The 2012 season produced some very exciting moments from the 2012 XR1200 series. Highlights:

4 top ten finishes

Paul James 13th place overall

Brice Cooper 14th place overall

Powerlet for Harley® Motorcycles

GET
IT
ON

Powerlet offers these quality tested and fully compatible products that work harmoniously with Harley® Motorcycles. We offer solutions that quickly install onto virtually any model and once installed have a professional OEM look, stay connected, perform in all weather conditions, are UV / Oil and gas stable and best of all, deliver power when and where you need it. Just ask AMA 9 time Grand National Flat Track Champion Scott Parker:

"I rely on Powerlet to power up my cell phone, GPS and my RapidFIRe heated clothing on my Street Glide. I don't need any issues when I am out on a long ride with my friends. Powerlet's cables and power outlets were designed specifically for the rigors of the open road. Their glove-friendly design insures ease of use, while the small size facilitates storage."

powerlet.com

Team Powerlet

Powerlet offers these quality tested and fully compatible products that work harmoniously with your BMW Motorcycle. We offer solutions to the CANbus problems that most riders encounter. Powerlet's CANbus kits install quick, have a professional OEM look, stay connected, perform in all weather conditions, are UV / Oil and gas stable and best of all, deliver power when and where you need it. Just ask AMA Superbike rider Larry Pegram:

"I don't choose sponsors just for the money. The product has to be top quality if it's going on my race bikes. Information and seconds count. I rely on Powerlet's Rugged Electrical Accessories to charge my batteries in between races and power for accessing data from our on board computers. Powerlet's plugs, sockets, and wires never fail. I put them on my street bikes to charge my phone too! Very cool products!"
